Steven B. Skinner, Christina McVey : Clinical Decision Making For The Physical Therapist Assistant before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Decision Making For The Physical Therapist Assistant:

0 of 0 people found the following review helpful. Great reference and very usefulBy Joshua GonzalesBook came in great condition, even though it was used there were no marks in it and it looked brand new. Book arrived quickly and on time. Is very detailed in explaining what is to happen in multiple clinical situations and what to expect. Overall a very good book and useful for the physical therapy field.2 of 2 people found the following review helpful. The book is okay as a review or reminderBy jsaisalligotThe book really just reiterates everything you learn in class and in PTA/PT text books. The book is a good reminder of what to review before going on clinicals, but definately not a

necessary read. I should have saved my \$40.00 and just re-read my notes from class.

Clinical Decision Making for the Physical Therapist Assistant is a practical guide to developing the clinical judgment essential to effective patient care. Co-authored by two prominent physical therapy educators, this informative reference addresses a skill that is crucial to the success of Physical Therapist Assistants (PTAs). Designed to integrate decision making into PTA education, it covers the types of decisions that must be made in physical therapy treatment and offers sound guidance on how to make them. Critical thinking questions and treatment activities are included with each chapter to enable students to apply what they've learned to real-life situations. This text is a valuable resource for intermediate and post intermediate physical therapist assistant courses. Designed Specifically for PTAs Provides clear guidance on making everyday clinical decisions Covers decision making in the context of major areas of physical therapy Integrates decision making into technical education Provides examples of decisions encountered in patient care
