Bernadette F. Rodak MS MLS, Jacqueline H. Carr MS CLSpH(NCA) CLDir(NCA) : Clinical Hematology Atlas - Elsevier eBook on VitalSource (Retail Access Card), 4e before purchasing it in order to gauge whether or not it would be worth my time, and all praised Clinical Hematology Atlas - Elsevier eBook on VitalSource (Retail Access Card), 4e:

Normal Newborn Peripheral Blood Morphology chapter covers the unique normal cells found in neonatal blood. A variety of high-quality schematic diagrams, photomicrographs, and electron micrographs visually reinforce your understanding of hematologic cellular morphology. Spiral binding and compact size make this book easy to use in a laboratory setting. Coverage of common cytochemical stains, along with a summary chart for interpretation, aids in classifying malignant and benign leukoproliferative disorders. Morphologic abnormalities are presented in chapters on erythrocytes and leukocytes, along with a schematic description of each cell, to provide correlations to various disease states. Body Fluids chapter covers the other fluids found in the body besides blood, using images from cytocentrifuged specimens. Updated information on the subtypes of chronic lymphocytic leukemia (CLL) helps you recognize variant forms of CLL you may encounter in the lab.
