Thomas Murry, Ricardo L. Carrau, Karen Chan : Clinical Management of Swallowing Disorders, Fourth Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Clinical Management of Swallowing Disorders, Fourth Edition:

Clinical Management of Swallowing Disorders, Fourth Edition is a core graduate-level textbook that addresses the needs of students who will treat swallowing disorders as well as clinicians who currently treat swallowing disorders in hospitals, rehabilitation centers, nursing homes, and private outpatient clinics. The fourth edition has been revised to bring the reader up to date in all aspects of the management of swallowing disorders. New to the fourth edition: Full color images throughout. Two new chapters that focus on the instrumental evaluation of swallowing (Chapter 6) and feeding and swallowing treatment options with infants and children (Chapter 10). Liberal use of tables that highlights

text material. Revised detailed glossary to explain medical and surgical terminology Extensively revised throughout to contain current information, reviews, and definitions. A PluralPlus companion website with video examples of actual patients. Clinical Management of Swallowing Disorders, Fourth Edition examines the diagnosis and treatment of swallowing disorders in children and adults and emphasizes team management, swallowing safety, nutrition, behavioral treatments and surgical options. The diagnosis and treatment of swallowing disorders is a major medical discipline that traverses multiple medical specialties, especially speech-language pathology and otolaryngology. The essential aspects of dysphagia management are presented in a format that both beginners and clinicians needing a practical update on dysphagia will find useful. A companion workbook is also available and sold separately to aid instructors in the delivery of content and to enhance and reinforce student comprehension.*NOTE:* This book comes with supplementary content on a PluralPlus companion website. If you purchase or rent a used copy of the printed book, the code to access the website printed inside the book may have been previously redeemed/used or be incorrect and you will not be able to use it. To guarantee access to the website, it is recommended you purchase a new copy of this book directly from Amazon or the publisher, Plural Publishing.

About the Author Thomas Murry, PhD is Professor of Speech Pathology in the Department of Otorhinolaryngology at Loma Linda University. He received his PhD from the University of Florida and his post-doctoral training from the Communication Sciences Laboratory, University of Florida. Dr. Murry has distinguished himself as a scientist, clinician, and educator in the areas of voice and swallowing. He serves on the Scientific Advisory Board of The Voice Foundation, the Advisory Board of the International Association of Phonosurgery, and on the scientific advisory board of the Pan European Voice Congress. His early research in voice science encompassed a wide range of voice related topics, including underwater communication systems, laryngeal cancer, performers voice disorders, and laryngeal neuropathologies. His current research interests include voice disorders and issues in performers voices and neurolaryngology. Ricardo L. Carrau, MD, FACS, joined the Department of Otolaryngology Head and Neck Surgery Department at The Ohio State University as a tenured Professor April 2011. He is the Director of the Comprehensive Skull Base Surgery Program and Co-Director of the research and education laboratory ALT-VISION (Anatomy Laboratory Toward Visuo-Spatial Innovations in Otolaryngology and Neurosurgery). He also organizes, develops and promotes the Sialendoscopy and Salivary Disorders program and the Swallowing Disorders Rehabilitation Program. In the past, he served at the University of Pittsburgh Medical Center, as the Medical Director of the Swallowing Disorders Center, Director of the Division of Maxillofacial Trauma and as a member of the Division of Rhinology and Allergy, Division of Head Neck Oncologic Surgery, Division of Skull Base Surgery and the Minimally Invasive Neurosurgery Center. Karen M.K. Chan, PhD, is an Assistant Professor and Director of the Swallowing Research Laboratory at the Division of Speech Hearing Sciences, The University of Hong Kong. She received her Speech Language Pathology training and PhD from The University of Hong Kong. Dr. Chan is an experienced clinician and researcher in the areas of voice and swallowing disorders. Her early research focuses on perceptual voice evaluation and voice training for professional voice users. Her current research interests are in assessment and treatment for motor speech disorders and swallowing problems in elderly, post-stroke individuals and head and neck cancer survivors.
