This workbook is designed to supplement the textbook Clinical Management of Swallowing Disorders, Third Edition. The workbook contains true or false, multiple choice, and fill-in-the-blank questions, along with study topics related to each chapter of the book. The questions are closely connected to the textbook, allowing students to review chapter material and quiz themselves in an efficient manner. The workbook covers all eleven chapters in the textbook and serves to supplement the classroom activities. A unique aspect of the workbook is the inclusion of several projects to

help with treatment planning in patients with swallowing disorders.

Nick Gunnell, MA, CCC/SLP(University of Central Florida), Doody's, (February 2013): "\*\*\*\*4 Stars! Practicing clinicians will find this a valuable review of the basics and application of best practices. Beneficial to all is the inclusion of several projects to help with treatment planning in patients with swallowing disorders, challenging clinicians' understanding and application with case studies." --Nick Gunnell, MA, CCC/SLP(University of Central Florida), Doody's, (February 2013)About the AuthorThomas Murry, Ph.D. is Professor of Speech Pathology in the Department of Otorhinolaryngology, Weill Cornell Medical College, Cornell University, New York, and Adjunct Professor Teachers College, Department of Biobehavioral Sciences, Columbia University, New York.
