Jack J. Kanski MD MS FRCS FRCOphth : Clinical Ophthalmology: A Systematic Approach, 5e before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Ophthalmology: A Systematic Approach, 5e:

0 of 0 people found the following review helpful. Great referenceBy Brandi RobinsonThis is an awesome book! I bought it when one of my docs recommended it and I couldn't have been more happy with it. I used it to study for NBEO part 2 national boards and it was very helpful. It's also nice to have on hand in clinic to look up anything you may need to, it's usually in this book!0 of 1 people found the following review helpful. GP's in the NetherlandsBy M. M. J. BrasseAs STOOHN we train Dutch GP's on primary care ophthalmology.This is a must have book!0 of 2 people found the following review helpful. None betterBy Kenny TrummelAs a 3rd year optometry student, there is no book I turn to more. Love it

This classic text, with its broad coverage, systematic presentation and superb colour illustrations, is a global bestseller. However, the main aims of this book remain unchanged: to provide the trainee with a systematic and easily assimilated knowledge of ophthalmology, and to give the more experienced practitioner an up-to-date, easily accessible reference work. This authoritative textbook retains the successful layout and approach of the bestselling fourth edition. Four extra chapters have been added on dry eye, scleritis, corneal and refractive surgery, and systemic diseases. Each chapter has been updated and expanded and the number of illustrations greatly increased. Over a third of the illustrations are new for this edition. Four extra chapters have been added on dry eye, scleritis, corneal and refractive surgery, and systemic diseases. The contents of each chapter have been updated and expanded and the number of illustrations has significantly increased.

REVIEWS OF PREVIOUS EDITIONS: "It is beautifully laid out and has excellent photographs and drawings - an excellent text for the intended audience - residents in ophthalmology." *American Journal of Ophthalmology* "It is difficult to fault the excellent book. It has become a standard text for trainee ophthalmologists." *British Journal of Ophthalmology* "Nothing has come close to superseding it in 10 years. If you only ever buy one textbook this is the one." *Optician*
