**Kathy Bonewit-West BS MEd : Clinical Procedures for Medical Assistants, 9e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Procedures for Medical Assistants, 9e:

0 of 0 people found the following review helpful. Excellent ChoiceBy cdmMy order came very fast and in perfect condition. It is efficiently and well organized and very easy to read. The book has demonstrations and videos that you can follow along. Also it has practice material online that help you get prepared for the chapter or class. The book is a hardback and it does have a little weight to it.2 of 2 people found the following review helpful. I like how the videos have the option of selecting captions ...By autumnleavesThis is a well organized and very instructional textbook. The online component that comes with the purchase of the book is very helpful, especially the video demonstrations. I like how the videos have the option of selecting captions on the screen in order to provide a transcript of all that is said during the presentations.0 of 0 people found the following review helpful. Five StarsBy Dan NepomGood read

Learn the concepts, procedures, and skills you need to succeed as a medical assistant! *Clinical Procedures for Medical Assistants* provides clear, step-by-step instructions for common office procedures such as taking vital signs, collecting and processing lab specimens, preparing patients for examinations, and assisting with office surgeries. Written by expert educator Kathy Bonewit-West, this edition covers the latest competencies and topics related to today's medical assisting practice, including HIPAA, the Electronic Health Record, and caring for special populations. It also includes four DVDs with video demonstrating 76 clinical skills described in the book. Over 120 procedures are presented in a clear, illustrated, step-by-step format, with online videos showing 84 of the procedures in action. Chapter outlines and learning objectives prepare you for the skills and concepts you will be learning. What Would You Do? What Would You Not Do? case studies challenge you to apply your knowledge to realistic medical office situations with a practitioner's response at the end of chapters. Putting It All Into Practice and Memories from Practicum boxes feature real medical assistants sharing personal, on-the-job experiences. Key Terms and Terminology Review help you master medical assisting terminology. Charting examples help you understand the process for charting your own procedures. Patient Teaching boxes prepare you for effective communication, with detailed instructions on how to answer questions and how to explain medical concepts and procedures. Student resources on the Evolve companion website offer a fun way to practice your medical assisting knowledge with animations, games such as Quiz Show and Road to Recovery, drag-and-drop exercises, Apply Your Knowledge exercises, matching exercises, and other interactive activities (blood pressure readings, determining height and weight, drawing up medication), as well as all video procedures and practicum activities. UPDATED fecal occult blood testing procedure includes new video demonstrating this procedure. UPDATED examples of medical assistants using an EHR are demonstrated in the video procedures, showing the use of electronic charting. Updated venipuncture photos show how to perform venipuncture. UPDATED content also includes topics such as the medical record, including HIPAA, electronic medical records, and advanced directives; emergency preparedness; the use of computer technology; medical asepsis; AIDS hepatitis; latex glove allergies non-latex gloves; vital signs including temporal artery thermometer, pulse oximetry, and the significance of pulse pressure; pediatrics including immunization information and IM injection theory; the colonoscopy; IV therapy; and the latest CLIA waived tests. All 84 procedure videos are now available on the Evolve companion website for convenient viewing
