Dr. Donald R. Murphy : Clinical Reasoning in Spine Pain. Volume I: Primary Management of Low Back Disorders Using the CRISP Protocols (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Reasoning in Spine Pain. Volume I: Primary Management of Low Back Disorders Using the CRISP Protocols (Volume 1):

0 of 0 people found the following review helpful. For every evidence based physician who treats low back painBy jeffreyThis is an incredible resource for practitioners who see low back pain patients. Every evidence based chiropractor should absolutely read this and have it in their library. The book helped me to systematize and make sense of a wide variety of conditions and treatment options for low back pain. This book is perfect for those just starting out in learning about treating low back pains as well as those who are very experienced. For the novice, it gives a great

starting point in being introduced to the most important conditions and concepts in treating them. There are incredible references in each subject so that the reader can gain more knowledge where they feel they might be lacking. For the experienced practitioner, it helps to blend and bring together many ideas and concepts and puts them all together in one resource. 1 of 1 people found the following review helpful. great book
By T. Holder
I have already torn through this book. Dr. Murphy has some great clinical pearls and insight to share within this text. When I first got it, I was a little surprised to find that it was more of a workbook, than a standard textbook. Although it's not reference heavy like most textbooks and doesn't keep listing references for every sentence like most textbooks, he does include recommended readings and peer-reviewed journal articles that are pertinent to the material. This book was a great read, in my opinion. I found the information to be very insightful and also directly related to actual clinical practice. If you don't want to be bogged down by a reference heavy textbook and instead learn useful skills and applications that you can implement immediately into your practice, I would highly recommend you get this book and read it all the way through. Anyone working with spine pain patients will benefit from reading this book. I can't wait for the Cervical edition!

By Josh Browning
This book is a must-read for all chiropractic physicians wanting to practice evidence based care. It provides detailed instructions on the diagnosis and treatment of the most common low back disorders. My confidence has grown immensely since mastering this book.

Clinical Reasoning in Spine Pain, Volume I: Primary Management of Low Back Disorders Using the CRISP Protocols, by internationally recognized clinician, author, and researcher Dr. Donald R. Murphy is a book for chiropractors, physical therapists, medical doctors, and other professionals as well as students who study, treat, and care for people with low back disorders. Unlike most medical texts, granular detail is replaced with a practical, evidence-based approach designed for real-world application. It gives clinicians and students a concise means to integrate disparate findings, organize clinical data, form a diagnosis, and design an effective management strategy. Murphy explains his unique approach to patient care with the Clinical Reasoning in Spine Pain (CRISP) protocols, an evidence-based, patient-centered, and relationship-oriented approach to diagnosis and management.

About the Author
Dr. Donald R. Murphy lives in Cranston, Rhode Island, with his wife and three daughters. A chiropractic physician for nearly thirty years, focusing on primary spine care, it is his deep commitment to foster the best care for patients suffering with low back and spine pain that led him to write his book, *Clinical Reasoning in Spine Pain, Volume I: Primary Management of Low Back Disorders*. Dr. Murphy is currently the Director of Primary Spine Care Services for Care New England Health System, a multi-hospital system serving Southern New England and based in Rhode Island. He is also Clinical Assistant Professor at the Alpert Medical School of Brown University. He is the lead instructor for the postgraduate certification course in Primary Spine Care given by the University of Pittsburgh. Information on this course can be found at primaryspineprovider.com. Dr. Murphy has published many articles in several peer-reviewed scientific journals and trade publications. He has been on the expert panel for several spine care guidelines, and has lectured around the world on numerous topics related to spine disorders.
