Donald R Murphy : Clinical Reasoning in Spine Pain Volume II: Primary Management of Cervical Disorders Using the CRISP Protocols Case Studies in Primary Spine Care (Volume 2) before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Reasoning in Spine Pain Volume II: Primary Management of Cervical Disorders Using the CRISP Protocols Case Studies in Primary Spine Care (Volume 2):

0 of 0 people found the following review helpful. An excellent foundation for new practitioners and enhancement of research-based spine ...By Brendan H McCannClinical guidance in the most practical format. An excellent foundation for new practitioners and enhancement of research-based spine management for established clinicians.0 of 0 people found the following review helpful. Great textBy D. L. L. DCAnother fine effort by one of the chiropractic

profession's finest. Great, practical information. 0 of 0 people found the following review helpful. An Asset to all Manual Therapy Practitioners By Sean P. Konrad, DCHave attended the primary spine practitioner seminars with Dr. Murphy regarding the CRISP protocols for the cervical spine and utilize them in our practice. This text is pretty much a compilation of that training and an asset to any manual therapy practitioner who wishes to treat from an evidence-based perspective.

Clinical Reasoning in Spine Pain, Volume II: Primary Management of Cervical Disorders Using the CRISP Protocols, by internationally recognized clinician, author, and researcher Dr. Donald R. Murphy is the second volume in the book series for chiropractors, physical therapists, medical doctors, and other professionals as well as students who study, treat, and care for people with spine problems. As in Volume I, this book provides the reader with a practical, evidence-based approach designed for real-world application. This Volume builds on Volume I, however it can also serve as a stand-alone text for those interested in an organized, evidence-based strategy to confidently manage patients with cervical (and thoracic) disorders. Murphy demonstrates how to apply his unique approach to patient care, the Clinical Reasoning in Spine Pain (CRISP) protocols, to cervical and thoracic patients. In addition, Murphy takes the reader one step further by including two chapters on Case Studies in Primary Spine Care in which real-world cases are presented that illustrate diagnosis, management and case coordination in a variety of patient scenarios from the standpoint of the Primary Spine Practitioner Soft cover; 434 pages

About the Author Dr. Donald R. Murphy is a chiropractic physician and is Director of Primary Spine Care Services for Care New England Health System, a multi-hospital system serving Southern New England and based in Rhode Island. He is also Clinical Assistant Professor in the Department of Family Medicine at the Warren Alpert Medical School of Brown University. He has been in practice for over 29 years, for most of that time as a primary spine practitioner. Dr. Murphy has been on the Expert Panels of several spine care guidelines and lectures all over the world on various topics related to spine disorders. He has published dozens of articles in numerous scientific journals as well as several books and book chapters. Volume I of this series, Clinical Reasoning in Spine Pain Vol. I: Primary Management of Low Back Disorders Using the CRISP Protocols is widely read all over the world and is utilized by several chiropractic institutions. Dr. Murphy is also the lead instructor for the Certification Course for Primary Spine Practitioners for the postgraduate certification course in Primary Spine Care given by the University of Pittsburgh. Information on this course can be found at primaryspineprovider.com. Dr. Murphy lives in Cranston, RI with his wife, Laura and his three daughters, Jessica, Alison and Melissa.
