Lindy Dubois MEd MMSc CO COMT : Clinical Skills for the Ophthalmic Examination: Basic Procedures (Basic Bookshelf for Eyecare Professionals) before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Skills for the Ophthalmic Examination: Basic Procedures (Basic Bookshelf for Eyecare Professionals):

The step-by-step, instructional guide for the most common ophthalmic instruments and procedures has been updated to a second edition. *Clinical Skills for the Ophthalmic Examination: Basic Procedures, Second Edition* provides details on tests frequently performed in the office and provides instructions on the proper way to perform them. Lindy DuBois focuses on presenting fundamental instruction in a clear and easy-to-use manual. Essential chapters, such as those on patient history, medications, allergies, and refractive surgery have been updated to offer critical information for the ophthalmic professional. New to this edition: An expanded History section with a detailed patient interview to comply with new regulations. Expanded Interim History section to include patients with low vision. New sections on Exophthalmometry and A-Scan Biometry. Make *Clinical Skills for the Ophthalmic Examination: Basic Procedures, Second Edition* your go-to text for information on the latest procedures and instruments used in the clinic today.

"This book fills an important need because there are few books currently available on this subject. The authors have done a commendable job of providing education on the most common procedures and instruments. It is written for everyone from the novice performing basic testing all the way to the most advanced technician collecting information on the pupil and ocular tensions. This second edition book is a big improvement over the first edition in both content and presentation of the procedures. It is an excellent learning guide for all ancillary personnel involved in providing eye care in the clinical setting. For the technician new to the eye care field, this is hands down the best starter book available today." -Brian D. Marshall, OD, The Laser Center, Doody's
