**Anna Storozhuk : Color: Ontological Status and Epistemic Role (Eye and Vision Research Developments)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Color: Ontological Status and Epistemic Role (Eye and Vision Research Developments):

In this book the complex impact of colour action on the organism is discussed. It is shown that the perception of colour depends on the action of irritants on other sensor systems and, vice versa, the action of colour may exert exciting or inhibiting influence on the perception of sounds or smells.
