From the reviews of the third edition: "The text is structured to provide a brief introduction to the basic science of the eye . It provides an excellent introduction to clinical ophthalmology, with clear and simple explanations . There are

146 figure drawings and numerous clinical photographs throughout which illustrate and illuminate the text well, providing high quality visual reference material. (Sumona Chaudhury, Eye News, April/May, 2007) "The book is well-written using a colloquial and clear style that makes the reader feel at ease with the text.
