Moira Stewart, Debra Roter : Communicating with Medical Patients (SAGE Series in Interpersonal Communication) before purchasing it in order to gage whether or not it would be worth my time, and all praised Communicating with Medical Patients (SAGE Series in Interpersonal Communication):

Designed to synthesize a growing international and interdisciplinary body of experience, this volume provides a mandate and a charge to medicine to fundamentally transform the traditional clinical method and the social relations it fosters between doctor and patient and between student and teacher. The contributors challenge the medical establishment to change their clinical method from that of a disease-centred to a patient-centred one. Four sections deal with issues related to the doctorprime;s own transformation, the medical interview, teaching and learning, and validation.
