NSSLHA : Communication Sciences Student Survival Guide before purchasing it in order to gauge whether or not it would be worth my time, and all praised Communication Sciences Student Survival Guide:

6 of 6 people found the following review helpful. A terrific help for a speech pathology/audiology student
By ShelbyMamaI bought this book for my daughter, who just changed majors as a junior from English to Speech Pathology/Audiology. I was very impressed when I got the book. It describes what you should be doing and organizations you should be joining for every year along the way: freshman through grad school. It even presents charts about median salary you can expect. It gives extensive charts as aids for the reports and other projects you have to do

as a student of this science. It also gives many resources in the back of the book about schools that offer this curricula. This book is a must-have for a speech path major or guidance counselor. 5 of 5 people found the following review helpful. Wish I would have had it sooner. By Jacob H, This book is great for anybody planning to go into the CSD field. It gives advice for students in high school, undergraduate college, graduate school, and even Ph.D students. Very helpful information on courses to take, GPA's, requirements to be an SLP or Audiologist, different organizations to be involved with, clinical practicum and writing for clinical practicum, and even resume and interview information. I gave it four stars because it is rather expensive, but it is well worth it. The earlier you buy this in your academic career the more helpful it will be. 1 of 1 people found the following review helpful. Book arrived exactly on time and in perfect condition. As a undergrad student. By Kimberly Ramos. Book arrived exactly on time and in perfect condition. As a undergrad student, I struggled with choosing a major and discovered more about Communication Sciences! I did plenty of research and decided this is what I want to pursue. I'm super excited. I want to become a Bilingual SLP in the future :)
