From Jossey-Bass : Community-Based Participatory Research for Health: From Process to Outcomes before purchasing it in order to gage whether or not it would be worth my time, and all praised Community-Based Participatory Research for Health: From Process to Outcomes:

2 of 2 people found the following review helpful. A must have for anyone working in communities. By Christina Ivazes This comprehensive description of Community Based Participatory Research is filled with guidance on how to carry out CBPR and how to avoid common errors. it contsins case studies that are stories of how researchers and communities can work together to reduce health disparities and improve sustainable health outcomes. CBPR, when done well, can leave communities empowered. A must for anyone working with a community, either as an insider or outsider. I will have it by my side for the duration of my career! 1 of 1 people found the following review helpful. If

you are considering CBPR, this is the ideal book. By Denise C. Lewis For anyone considering CBPR, this edited volume is a must have. It is one of the best compilations of information on CBPR I've found. I highly recommend it. 0 of 0 people found the following review helpful. Five Stars By Sharon Comprehensive and well-organized.

Minkler and Wallerstein have pulled together a fantastic set of contributions from the leading researchers in the field. In addition to a fine collection of case studies, this book puts the key issues for researchers and practitioners in a historical, philosophical, and applied, practical context

From the Back Cover Praise for the Second Edition of Community-Based Participatory Research for Health "A must-read for funders, researchers, and community partners committed to authentic, change-making community engagement." — Gail C. Christopher, DN, vice president for health, W.K. Kellogg Foundation "This welcome new edition critically analyzes the growing use and evaluation of community-based participatory research to expose and alter societal conditions driving health inequities—and encourage action for health equity." — Nancy Krieger, PhD, professor, Department of Society, Human Development, and Health, Harvard School of Public Health "Minkler and Wallerstein have pulled together a fantastic set of contributions from the leading researchers in the field. In addition to a fine collection of case studies, this book puts the key issues for researchers and practitioners in a historical, philosophical, and applied practical context." — David Buchanan, DrPH, professor of Community Health Education, School of Public Health and Health Sciences, University of Massachusetts, Amherst, and author, An Ethic for Health Promotion "A must-read for those whose vision is to build a democratic health care system that improves the well-being of the entire nation by embracing and including populations currently estranged from justice in access to health care simply by virtue of personal characteristics or circumstances." — Henrie M. Treadwell, PhD, director, Community Voices and Men's Health Initiatives, Morehouse School of Medicine "This exciting new edition offers new directions and critically reflects on the goals, processes, and outcomes in this partnership approach to research." — Ann C. Macaulay, CM, MD, professor of family medicine, director, Participatory Research, Department of Family Medicine, McGill University About the Author Meredith Minkler, DRPH, is professor and chair of Community Health Education and Health and Social Behavior, Division of Health and Social Behavior, at the School of Public Health, University of California, Berkeley, California. Nina Wallerstein, DRPH, is professor and founding director of the MPH program at the University of New Mexico Health Sciences Center, Albuquerque, New Mexico.
