Karen A. Hacker : Community-Based Participatory Research before purchasing it in order to gage whether or not it would be worth my time, and all praised Community-Based Participatory Research:

0 of 0 people found the following review helpful. Great book for social science researchers! By Caitlin Eckert Great book. Really nice overview for CBPR that helped me in my PhD social work class. 1 of 1 people found the following review helpful. A must for the bookshelf By R. R. Hixson Excellent resource which goes into depth in explaining many of the key factors pushing the popularity of CBPR. Researchers and practitioners could utilize the steps she offer in planning a CBPR. 0 of 0 people found the following review helpful. A bit of a high price for such a small book,

but...By Carol MatthewsNew :-)

Community Based Participatory Research by Dr. Karen Hacker presents a practical approach to Cbpr by describing how an individual researcher might understand and then actually conduct Cbpr research. This how-to bo

About the AuthorDr. Karen Hacker, M.D., MPH, is the executive director of the Institute for Community Health, a community research organization dedicated to CBPR (Community Based Participatory Research) in Cambridge, MA. She is an associate professor of medicine at the Harvard Medical School and Harvard School of Public Health, where she teaches Community-Based Participatory Action Research. She serves as the Senior Medical Director for Public and Community Health at the Cambridge Health Alliance and provides leadership for population health initiatives as well as practicing as a primary care physician. She received her M.D. from Northwestern University, her adolescent medicine fellowship from Children's Hospital of Los Angeles, and her masters from Boston University. She has extensive experience with CBPR and has worked with diverse community partners to catalyze change in both practice and research environments focusing on topics that range from child mental health and immigrant health to obesity prevention.
