thoroughly teaches how to heal yourself naturally. It's very inspiring to hear so many of the case stories where Dr. May was able to heal people in ways modern medicine could not. And what she teaches truly heals people without just covering up the symptoms. Definitely would recommend this to anyone that wants to learn how to take control of their health and feel better than ever before.

Members of our military are always working for our freedom. They give their lives, their health, and sometimes their sanity. But are we giving them the best we have to offer when they need healing? The time is now to bring the best healing potential to all the beautiful men and women who have demonstrated their love for our country with their service.
