**Shelley Safian : Complete Procedure Coding Book** before purchasing it in order to gage whether or not it would be worth my time, and all praised Complete Procedure Coding Book:

2 of 2 people found the following review helpful. Great resource By Linda Lou I bought this text as a requirement for my college Coding class and found it to be a great reference text. There are well-explained examples throughout the text. I like how it links to the codes manual and explains how to find the correct code. I have spent a lot of money on useless college books but this one and the diagnosis books, I will be keeping for future reference. 0 of 0 people found the following review helpful. One Star By leticia Bolorin Truly a shame great book but no answer keys to check your work. 3 of 3 people found the following review helpful. complete procedure coding book By Sara This group of books was suggested to me by an instructor of Medical billing/coding and I have found it to be very helpful. I do wish it had the answer keys so that I could check my choices against it.

The Complete Procedure Coding Book introduces students to the coding process and uses case studies, examples, and a lighter writing style to sit side-by-side with the student and bring them through learning to code. This book speaks directly to students with respect and helps them to overcome the intimidation of learning such an important new skill. Case studies, examples, and exercises are salted generously throughout the book to connect the reader with real life scenarios and to help them relate to the issues at hand.

**About the Author** Shelley C. Safian Dr. Shelley C. Safian has been teaching Health Care Administration, Health Information Management, and Medical Billing and Coding, both onsite and online, for more than 15 years. Safian writes a monthly QA column for the online publication JustCoding and writes several articles each year on various aspects of coding. In addition, she is the author of six textbooks. Her newest book, Foundations of Health Care Administration, was released January 2014. Safian is in her fourth year as the chair of the continuing education committee for FHIMA (Florida Health Information Management Association). In the past, she has served on several committees and practice councils on the national, state, and local levels of the American Health Information Management Association. She is a Registered Health Information Administrator (RHIA), a Certified Coding Specialist (CCS-P), a Certified Professional Coder (CPC-H, CPC-I), and an ICD-10-CM/PCS trainer.
