HCPPro a division of BLR, Frosini Rubertino RN BSN C-NE CONA/LTC : Consolidated Billing for Long-Term Care before purchasing it in order to gage whether or not it would be worth my time, and all praised Consolidated Billing for Long-Term Care:

Consolidated billing remains a constant challenge for compliance and billing long-term care professionals. Consolidated Billing for Long-Term Care helps skilled nursing facilities (SNF) figure out which billed services they are responsible for paying and which they are not. This book opens with helpful background information on the intersection of SNF services and billing. It then covers the five major categories of consolidated billing and all the service inclusions and exclusions that apply to each, with an entire chapter dedicated to dissecting the trickiest cases. Also detailed is how to determine which components of an invoice should be paid and how to develop airtight

payment agreements with outside service partners. Finally, this book provides strategies for implementing and shaping industry-required compliance systems (i.e., compliance and ethics programs and QAPI) that promote successful consolidated billing. Included are case scenarios and figures to illustrate key concepts, tips on avoiding fraudulent practices and other common billing pitfalls, and guidance on obtaining appropriate reimbursement. This resource will help you to do the following:

- Apply expert insight and insider tips to your SNF consolidated billing
- Understand what is excluded and included under consolidated billing
- Improve workflow and financial viability with compliant consolidated billing practices
- Avoid auditor scrutiny by correctly submitting claims to Medicare on the first try
