Anastasius Moutzoglou : M-Health Innovations for Patient-Centered Care before purchasing it in order to gauge whether or not it would be worth my time, and all praised M-Health Innovations for Patient-Centered Care:

The integration of mobile technology into the medical industry has revolutionized the efficiency and delivery of healthcare services. Once limited by distance and physical barriers, health professionals can now reach patients and other practitioners with ease. M-Health Innovations for Patient-Centered Care is a pivotal reference source for the latest scholarly research on the incorporation of mobile telecommunication devices in the health field and how this technology has increased overall quality of care. Highlighting various types of available technologies, necessary

support infrastructures, and alterations in business models, this publication is ideally designed for medical professionals, upper-level students, and e-health system designers interested in the effects of mobile technology on healthcare delivery.

About the Author Anastasios Moutzoglou has been an Executive Board Member of the European Society for Quality in HealthCare (ESQH), and President of the Hellenic Society for Quality Safety in HealthCare (HSQSH). He holds B.A in Economics (National Kapodistrian University of Athens), MA in Health Services Management (National School of Public Health), MA in Macroeconomics (The University of Liverpool), and Ph.D. in Economics (National Kapodistrian University of Athens). He works for 'P. A. Kyriakou' Children's Hospital and teaches the module of quality at the graduate and postgraduate level. He has written three Greek books, which are the only ones in the Greek references. He is also Editor-in-Chief of the International Journal of Reliable and Quality E-Healthcare (IJRQEH) and has edited the book E-Health Systems Quality and Reliability: Models and Standards. He has served as a scientific coordinator and researcher in Greek and European research programs, while, in 2004, he was declared Person of Quality in Healthcare, with respect to Greece. His research interests include healthcare management, quality, knowledge management, pensions, and the dualism of the labor market.
