This text teaches medical terminology by familiarizing students with how medical terms are formed and by providing a systematic learning structure. The first three chapters of the text introduce how medical terms are formed and the major word parts from which many of the terms are formed. Chapters 4 through 16 are the body systems chapters. The remaining chapters cover additional medical terminology.

About the Author Nina Thierer (B.S., CMA, CPC), teaches in the Medical Assisting program at Ivy Tech Community College, Fort Wayne, IN.
