**Health Professions Institute : Medical Transcription: Fundamentals and Practice (2nd Edition)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Transcription: Fundamentals and Practice (2nd Edition):

0 of 0 people found the following review helpful. Best study book every. By Jeannie Medical Transcription: Fundamentals and Practice (2nd Edition) Very well written. Be prepared to laugh with the Author and at your self. I am still working with this excellent book in conjunction with the Medical Transcription Fundamentals by Gilmore. These books are holding my attention and encouraging me to forge ahead seeking knowledge. It gave me the understanding that I am not the only student that is going through the things described in the book. It has awakened a desire for knowledge. The humor is wonderful. I simply do not want to put this book down unless I am off to bed Ten thumbs up

on this book everyday. 0 of 0 people found the following review helpful. Medical Transcription: Fundamentals and Practice (2nd Edition) By Sharon Imafidon I received my books on time, which I appreciate. The Medical Transcription: Fundamentals and Practice (2nd Edition) had spots on the book, both back and front, and I had to use alcohol to wipe it off. On the back of the book there is a 'used' sticker. I paid for a 'new' book. I would like to know, why did I receive a used one? Thank you for getting back with me about this! 0 of 0 people found the following review helpful. School By AnJeanette White I needed this book for school and does help with the homework that needed to be done. Recommend to use it

Teaching users how to transcribe actual medical dictation so that they can develop the selective hearing skills and experience necessary to gain competency as a medical transcriptionist, this guide offers a unique combination of authentic physician dictation by body systems, coordinated readings and exercises by medical specialty, and supplementary information vital to every medical transcriptionist. Supports text with six hours of authentic physical dictation not synthetic studio recording; all dictations are carefully selected for subject matter, professionally edited to delete confidential identifying information, and then sequenced in a way to promote comprehension and encourage learning. Groups tapes by medical specialty (i.e., dermatology, urology, gastroenterology, cardiology, pulmonary medicine, endocrinology, orthopedics, obstetrics and gynecology, otorhinolaryngology, and radiology), with each dictation report offering the best example of its type for vocabulary density, technical content, and other instructional criteria; each report includes chart notes, letters, initial office valuations, consultations, history and physical examinations, discharge summaries, operative reports, emergency department reports, procedure notes, and diagnostic studies from each medical specialty. For anyone in the medical profession who wants to learn basic medical transcription, including medical assistants and legal transcription/court reporters.
