HEALTH PROFESSIONS INST : Medical Transcription: Fundamentals and Practice (3rd Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Transcription: Fundamentals and Practice (3rd Edition):

6 of 6 people found the following review helpful. Great book but no transcription key! By C. Morgan The book has a lot of great information and it is helpful. However, the dictation on the cd is not really very useful if you don't know if your transcription is correct you will never know. You need a key to see if you transcribed the dictation correctly....key only available to instructors. 2 of 2 people found the following review helpful. Good but not perfect -no answer key By KrissySYDI gave it 3 stars as it misses one very important feature for effective self-learning: answer key. Aside from that it is a great book, exactly what I needed to become familiar with the most common medical terms and concepts 0 of 0 people found the following review helpful. Four Stars By BDD did good info

Teaching users how to transcribe actual medical dictation so that they can develop the selective hearing skills and experience necessary to gain competency as a medical transcriptionist, this guide offers a unique combination of authentic physician dictation by body systems, coordinated readings and exercises by medical specialty, and supplementary information vital to every medical transcriptionist. Supports text with six hours of authentic physical dictationnot synthetic studio recording; all dictations are carefully selected for subject matter, professionally edited to delete confidential identifying information, and then sequenced in a way to promote comprehension and encourage learning. Groups tapes by medical specialty (i.e., dermatology, urology, gastroenterology, cardiology, pulmonary medicine, endocrinology, orthopedics, obstetrics and gynecology, otorhinolaryngology, and radiology), with each dictation report offering the best example of its type for vocabulary density, technical content, and other instructional criteria; each report includes chart notes, letters, initial office valuations, consultations, history and physical examinations, discharge summaries, operative reports, emergency department reports, procedure notes, and diagnostic studies from each medical specialty. For anyone in the medical profession who wants to learn basic medical transcription, including medical assistants and legal transcription/court reporters.
