**Diane M. Gilmore : Medical Transcription Projects** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Transcription Projects:

3 of 3 people found the following review helpful. No audio files with text  
By Kindle Customer Elaine  
There were supposed to be audio files or at least a link to get them and there was no such thing. When I looked online for them, it said the audio files are not available. The book is pretty useless without them.  
3 of 3 people found the following review helpful. No access code to download the data files. Wasted money.  
By Sandra J. Rhoades  
There was no software to get the data files to even begin to work on this. I could not even purchase an access code from Cengage. I feel that if your going to pay for a text book, then an access code or software should be included. It was a waste of money on my part.

Are you looking for a resource that provides a real-life, hands-on opportunity to participate in the document-production process of a typical healthcare provider? As a medical transcriptionist, you will be expected to transcribe patient information and documentation using highly specialized language on the most up-to-date technical computer

platforms and software programs. MEDICAL TRANSCRIPTION PROJECTS enables you to practice your working knowledge of the medical reports most commonly used in hospital and ambulatory care settings as you transcribe reports dictated by real physicians taken from reports of actual patients. Inside you will find the tools you need to practice everything from proofreading skills and listening to and editing speech-recognition-generated documents to formatting medical reports in accordance with the established guidelines of the AHDI and completing cloze exercises which will encourage your understanding of medical terminology in the context of a medical report.

1. Otorhinolaryngology. 2. Ophthalmology. 3. Pulmonology. 4. Cardiology. 5. Gastroenterology. 6. Obstetrics/Gynecology. 7. Urology. 8. Orthopedics. 9. Dermatology. 10. Neurology. 11. Oncology. 12. Immunology. Appendix A: Helpful Medical Transcription Web Sites. Official Joint Commission "Do Not Use" List. Institute for Safe Medication Practices (ISMP) List of Error-Prone Abbreviations, Symbols, and Dose Designations. Appendix B: Common Laboratory Values. Commonly Used Metric System Units, Symbols, and Prefixes. Figure Credits. Appendix C: Sample Reports. Appendix D: Student Progress Sheet.

About the Author Diane Gilmore is an active member of the medical transcription profession. She has been a medical transcriptionist for more than 14 years and is the author of two medical transcription books. Currently Ms. Gilmore works as the Director of Education and Instructor of Med-Line School of Medical Transcription, a national medical transcription educator located in Arizona. Ms. Gilmore has been a member of the Association for Healthcare Documentation Integrity (AHDI) since 2004, has been a certified medical transcriptionist (CMT) since 2005 and received the designation of Fellow of AHDI in 2008. Diane has served as President of her local AHDI chapter, conducting membership drives, organizing symposiums and chapter meetings, and serving as editor of the chapter newsletter. She is currently a working transcriptionist for a large medical transcription company and stays current with trends related to the profession. In addition, Diane has 25 years of legal assistant experience and has written two textbooks related to the legal profession as well as having served in various offices and committees in that field. She has been an invited speaker at regional and national legal support staff events about computers and technology.
