Richard Kronick, Joy De Beyer : Medicare Hmos: Making Them Work for the Chronically Ill before purchasing it in order to gage whether or not it would be worth my time, and all praised Medicare Hmos: Making Them Work for the Chronically Ill:

0 of 0 people found the following review helpful. Excellent, Thoughtful WorkBy Kip PiperExcellent, thoughtful advice on addressing a troubling problem in making managed care work for the benefit of Medicare beneficiaries. Nicely presented. Highly recommended.

The lure of reduced costs and improved health outcomes has spurred the Medicare managed care movement. But will these desired outcomes be achieved? This book explores a practice called risk selection—the selection of plan enrollees based on the individual's health status, which poses a serious threat to the quality of healthcare for the chronically ill—and offers strategies for ensuring high quality Medicare managed care. Includes contributions by Thomas Rice, Ph.D., Tony Dreyfus, Ph.D., Mark Merlis, Ph.D., and others. This book takes an in-depth look at: * The role of HMOs in Medicare * Strategies for oversight and regulation of Medicare HMOs * The extent and implications of risk selection * The adjustment of capitation rates to reflect health status * The creation of standard benefit offerings to Medicare HMO enrollees

About the Author Richard Kronick, Ph.D., is associate professor of Family and Preventive Medicine at the University of California, San Diego. Joy de Beyer, D.Phil., is Assistant Adjunct Professor at the University of California, San Diego.
