**Moon : MEDICARE NOW AND IN THE FUTURE, SECOND E** before purchasing it in order to gage whether or not it would be worth my time, and all praised MEDICARE NOW AND IN THE FUTURE, SECOND E:

Medicare has been a major political battleground at the federal level because of the deteriorating financial condition of

the Medicare Trust Funds and the continuing growth of Medicare as a share of the federal budget. This book offers a look at the workings of this complicated program and assesses a broad range of options for change.

"...provides a good survey of Medicare and a carefully argued program of reform, so that it could serve well for the student seeking to understand the subject and for the expert professional looking for well-considered policy options." -- Journal of Health Politics, Policy And Law  
"This book is a thoughtful, carefully researched, clearly presented analysis of Medicare--a must for anyone interested in how best to move ahead to a health plan for all." -- Robert Ball, Former Commissioner of Social Security  
About the Author  
Marilyn Moon's most recent book is "Entitlements and the Elderly: Protecting Promises, Recognizing Realities" (Urban Institute Press, 1995). She currently serves as one of the two public trustees of the Social Security and Medicare trust funds.
