About the Author After spending over 30 years in the corporate world with Fortune 500 companies, David Williamson decided it was time to return to his home state and take care of personal matters, namely the care of his aging mother. As it turned out, that care came to include his aging mother-in-law as well. Over the next ten years, Dave and his wife looked after both parents until their passing. This experience opened their eyes to the world of Medicare and the problems that seniors face. He opened the first of two insurance agencies in 2000, and concentrated on two things: the best products, coupled with first class service to all his clients. Though he had been dealing with Medicare issues with his own parents for over 25 years, upon reaching 65 himself, he got a first-hand look at the mounds of paperwork that seniors receive as they reach Medicare age. He saw how the untrained person might throw up their hands in frustration. After coming to him for assistance, his senior clients said that they now understood the process, because he was able to simplify it into understandable terms and steps. Based on this combination of experiences, Dave decided to write this book with the desire to simplify seniors' lives as they address the issue of Medicare.
