**Linda Casser, Freddy W. Chang, Daniel Gertsman, Paul Pietsch, Arthur Bradley : MEPC: Optometry: Examination Review** before purchasing it in order to gage whether or not it would be worth my time, and all praised MEPC: Optometry: Examination Review:

0 of 0 people found the following review helpful. so/soBy Anatole GutowskiOutdated material0 of 0 people found the following review helpful. Useful; not necessaryBy varmsjokoladeI used this book sparingly during preparation for the NBEO Part I exam. It has questions, answers, and explanations. It was fairly helpful, but in retrospect, I probably didn't need this book.0 of 0 people found the following review helpful. good questionsBy opt studentThis was a great product to review for boards. I think the questions are pretty similar and based off of the different categories of boards. It is great if you just want to go at your own pace. I got this book the semester before boards part one and have gone over a few questions every day to prepare. I would recommend this for anyone who is taking boards soon.

This edition has been updated to reflect developments in optometry and related health-care fields. The material has been re-organized and new topics have been added. This work should provide a resource for the student and

practitioner.
