Hamsa Tayeb : Molecular Epidemiology of Diarrhoeal Virus: Molecular Epidemiology of Diarrhoeal Virus Infection in Children in Saudi Arabia before purchasing it in order to gage whether or not it would be worth my time, and all praised Molecular Epidemiology of Diarrhoeal Virus: Molecular Epidemiology of Diarrhoeal Virus

Infection in Children in Saudi Arabia:

The etiology of viral diarrhoea in children in the Saudi Arabia is incompletely characterized. Available data suggest that the causative agents are found at approximately similar frequencies here as elsewhere. This book addressed; the epidemiology of diarrhea viruses in pediatric populations initially rotavirus, enteric adenovirus, astrovirus and norovirus. Furthermore, the existing data on these Viruses in KSA and, characterization for genotypes using molecular methods in KSA.

About the Author Dr. Hamsa Taher Tayeb, Associate Research scientist, Molecular Virology Infectious Disease Place and Date Of Birth: 05 April 1978, Makkah, Saudi Arabia Married, with children
