**From Paul Rozin : Morality and Health** before purchasing it in order to gage whether or not it would be worth my time, and all praised Morality and Health:

From the castigation and stigmatization of victims of AIDS to our celebration of diet, exercise and fitness, the moral

categorization of health and disease reflects contemporary notions that disease results from moral failure and that health is the representation of moral triumph. Ranging across academic disciplines and historical time periods, the essays in *Morality and Health* offer a compelling assessment of the powerful role of moral systems for judging the complex questions of risk and responsibility for disease, the experience of illness, and social and cultural responses to those who are sick. Contributors include Keith Thomas, Charles Rosenberg, Richard Shweder, Arthur Kleinman, David Mechanic, Nancy Tomes and Linda Gordon.

"This collection is as timely as it is astute and penetrating. Crossing disciplinary boundaries with depth and grace, the authors chronicle the pervasive moralizing of illness and dysfunction in our times.." -Sue E. Estroff, Professor of Social Medicine, Anthropology and Psychiatry at the University of North Carolina at Chapel Hill

From the Back Cover  
*Morality and Health: Interdisciplinary Perspectives* provides a compelling assessment of the powerful role moral systems play in addressing matters of health and disease. Encompassing a wide range of academic disciplines, the essays draw on the fields of psychology, medicine, history, sociology, political science, anthropology, sociology and law.

About the Author  
Paul Rozin is Professor of Psychology at the University of Pennsylvania. Allan Brandt is Kass Professor of the History of Medicine at Harvard University Medical School and the author of *No Magic Bullet*.
