It doesn't go too much in depth but if you read something and don't remember learning it then that's probably where you need to focus on. This book comes with an online code that takes you to a really helpful mock registry website that you can even use on an iPad. There are review modes on this website that if you get the question wrong will have a very helpful explanation of why you were wrong. When preparing for the

registry I went through all the review questions and did two or three mock registries(the review questions are randomized and timed) . The website made it very Convienient and fun. Between this and the Lange flash cards box i felt that I was very prepaired And my score on the registry reflected it. :)4 of 4 people found the following review helpful.
