Demonstrations of trauma and pathology include both routine and special projections to prepare you for unique situations encountered in the clinical environment. Image evaluation exercises show positioning as well as technical errors, and promote critical thinking. Labeling exercises provide a review of the anatomy and articulations of body parts, challenging your knowledge and helping you determine if you're ready to proceed in the module. Self-assessment quizzes help you determine your strengths and weaknesses before taking the exam. Glossary link on every screen offers easy access to glossary terms at any point in the course. Key terms are bolded and linked to definitions in the glossary. Image enlargement lets you see the details of radiographs in pop-up windows.
