mistakes throughout. The images used are often poor quality or REALLY tiny. One of the biggest complaints our classes have had is that they are ONLY going to be doing CT but there is WAYYY TOO MUCH MRI information and images. MRI and CT are very different to look at or read and MRI can be even more different depending on its being T1 or T2 weighted which again has nothing to do with CT. The extremely long chapters have extremely brief quizzes. The material is very dry to read. 0 of 0 people found the following review helpful. Exactly what I needed. By Cissy Dietrich I needed a physical access code to put into my online class for college. I searched everywhere and this was exactly what I needed.
