Martha Piper PT PhD, Johanna Darrah MSc PT : Motor Assessment of the Developing Infant before purchasing it in order to gauge whether or not it would be worth my time, and all praised Motor Assessment of the Developing Infant:

0 of 0 people found the following review helpful. Five Stars By Customer great 0 of 0 people found the following review helpful. Babys development By Teija Polso Excellent hand book for those who work with babies You can analyze development during the first baby-year Me like it 0 of 0 people found the following review helpful. I am happy. By S. Srinivasan Product is what I expected and the delivery was in time. I am happy.

Presents theories of infant motor development and discusses the unique challenges involved in the assessment of the motor skills of developing infants as compared to that of adults. Provides step-by-step instruction for using the Alberta Infant Motor Scale (AIMS)--a new scale that measures infant motor development. Features a review of the major theories of motor development, line drawings and photographs of each movement skill, and a percentile graph enabling the user to plot and infant's score and derive a visual estimate of his/her percentile ranking.
