I've studied at a 'chain school' that 'teaches to the license' and prepares MTs to work in spas. That means there is very little focus on therapeutic techniques - yet most clients seek massage because they are in pain. A classmate told me about Positional Release, which led me to the works of Dr Leon Chaitow, including Muscle Energy Techniques, Fascial Dysfunction, and Breathing Pattern Disorders. My classmate had been so successful alleviating student clinic clients' pain using Positional Release that I bought all of Chaitow's books, and then, one week before the end of school, I was able to attend a weekend workshop in NYC where he taught all of these techniques. That was

yesterday; today I used what I learned in my final Massage exam on a student who had spent the weekend moving, and came to class in extreme pain. When I was done using Dr Chaitow's techniques, she was pain free - and based on what I've seen of PR during the year, I believe that (as long as she doesn't repeat the patterns that created the pain in the first place) she will remain pain free. Every LMT who wants to do therapeutic massage could be more effective using these techniques.0 of 0 people found the following review helpful. Comments about previous editions I'm rather taken with the new edition of this book. Dr. Chaitow has gathered well known experts from several disciplines and has crafted a book that will be used by all of them. A great deal of care has gone into this book. There is a wealth of clinical information and a very good overview of research regarding the use of MET in managing a range of conditions and clinical situations. The focus on other disciplines is a great plus in this new edition. I recommend it. Weighted Numerical Score 95 - 4 Stars! Dana J. Lawrence, DC of Doody's Books This book does not disappoint. Everything you ever wanted to know about [MET] is contained within these pages. The format is very user friendly and the book is littered with clinically relevant ideas and techniques. The volume is sure to help enhance your practice.
