When I recieved the book, I noticed it looked a little funny with black tape patching different places on the front and back of the book considering the book was in great shape. Assuming the tape was there to serve as protection, I thought nothing of it until one day when I tried removing it to look at the ISBN number on the back of the book. After peeling off the tape I noticed it was there to cover the big fat label on the back of the book which says not to sell the book because it was a teacher's manual. I usually sell back my books to either or the bookstore after the semester but now, because I've been sold this book, my only option is to send it back to the company, which is legally what the seller should have done. Not happy.0 of 0 people found the following review helpful. Five StarsBy Julie wallIt worked out for my daughters College class. Thanks0 of 0 people found the following review helpful.
