GoberMy Medical Journal has been a saving grace for my mother. She is 80 and has several medical conditions that require frequent lab work, rehab, Dr. instructions and much more. This Journal makes organizing and accessing medical information very easy. In addition, in case of emergency, medical personnel would have full knowledge of a patient's medical profile. This is a necessity for anyone interested in keeping medical information organized. I highly recommend this Journal for all ages.0 of 0 people found the following review helpful.
