Thanks to all who have shared their positive success with my natural nail fungus treatment method, it has lead myself to publishing a 2nd Edition of this book! Don't worry if you have already bought the 1st Edition, the method of treatment for the 1st and 2nd Edition is exactly the same, so you will not need to purchase this one as well. However, the time for expected results has changed from 60 days to 30 days since I've found most people are recovering from this problem in just 1 month now! Lets' get serious here, nail fungus is embarrassing! And it can be painful as well. Unfortunately, I developed nail fungus in my college years, and I wore nothing but closed toe shoes wherever I went. I soon turned away from my hobbies of swimming and going to the beach as I was too self-conscious of others noticing my feet. I knew something had to be done, as this problem was beginning to impact my social life. I tried a few western style medications prescribed by my podiatrist, where I did receive some improvements, however, it never completely cured the problem. I also experienced a negative side effect from one of the medications, which in the end is why I decided to do my own research into finding a natural solution. Having suffered from nail fungus for several years, I was able to find a natural solution that worked. And it worked fast! By being consistent with the natural treatment each day I was able to completely eliminate all of the fungus in my nails within only 2 months. I've since adapted additional fungus-repelling methods to my now fungus-free life (which I still do), which has prevented the fungus from ever re-occurring. If you are struggling from nail fungus, you can adopt this natural method and be fungus free in not 60 but now 30 days! Yes, I've refined the method since I've experimented it on myself, and most people see dramatic results in as little as 1 month! I say this with experience from helping many other victims with this horrible infection. Never let nail fungus negatively impact your life again! Feel free walking barefoot, feel sexy wearing non-closed toe high heels and never ever feel self-conscious about taking your shoes off in front of other people again!
