Tear Film: Structure, Function and Clinical Examination, 1e:

Contemporary and thoroughly up-to-date, this book advises contact lens practitioners on the examination, function and pathogenesis of the tear film. With comprehensive text and superb colour illustrations, this manual presents the most current information on tear film research. An essential purchase for all practitioners involved in contact lens fitting and prescribing. Part of the invaluable Butterworth-Heinemann/BCLA series. Current, comprehensive coverage. First class contributions by leading international experts.

Sudi Patel, Optometric Adviser for the Common Services Agency, Visiting Professor, Instituto Oftalmologico de Alicante, Spain, Optician, July 2002
