Carl A. Burtis, Edward R. Ashwood, David E. Bruns : Tietz Textbook of Clinical Chemistry and Molecular Diagnostics, 4e (Tietz Textbook of Clinical Chemistry (Burtis)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Tietz Textbook of Clinical Chemistry and Molecular Diagnostics, 4e (Tietz Textbook of Clinical Chemistry (Burtis)):

Bridging the gap between the clinical laboratory and medical management by relating pathophysiology to analytical results in health and disease, this classic resource provides the guidance necessary to select, perform, and evaluate the

results of new and established laboratory tests. Its up-to-date, encyclopedic coverage of the field defines analytical criteria for the medical usefulness of laboratory procedures, introduces new approaches for establishing reference ranges, describes variables that affect tests and results, examines modern analytical tools and their impact on lab management and costs, and demonstrates the applications of statistical methods. All three editors are well known in the clinical chemistry world, and they bring a wealth of expertise to this reference. Encompasses the tremendous strides made in clinical laboratory medicine in recent years keeping readers completely up to date. Nearly 800 tables and figures illustrate key issues in clinical chemistry. A comprehensive chapter containing tables of reference values provides one location for comparing and evaluating test results. A section has been added that contains 8 new chapters that focus on emerging issues and techniques in molecular diagnostics and genetics. Co-editor David Bruns, the editor of *Clinical Chemistry*, provides an authoritative look into laboratory medicine in general and specifically in the field of molecular technology.

"needed addition...in the clinical laboratory" -- *JAMA*, May 24/31, 2006
"obligatory reference...mandates acquisition" -- *Clinical Chemistry*, June 2006
"venerable, comprehensive overview" -- *Clinical Biochemistry*, February 2006
From the Publisher All three editors are well known in the clinical chemistry world, and they bring a wealth of expertise to this reference. Encompasses the tremendous strides made in clinical laboratory medicine in recent years keeping readers completely up to date. Nearly 800 tables and figures illustrate key issues in clinical chemistry. A comprehensive chapter containing tables of reference values provides one location for comparing and evaluating test results.
About the Author Carl A. Burtis, PhD, Chief, Clinical Chemistry, Health Division, Oak Ridge National Laboratory, Oak Ridge, TN, and Clinical Professor of Pathology, University of Utah School of Medicine, Salt Lake City, UT; Edward R. Ashwood, MD, Professor of Pathology, University of Utah, and Laboratory Director, ARUP Laboratories, Salt Lake City, UT; and David E. Bruns, MD, Professor of Pathology, Director of Clinical Chemistry and Associate Director of Molecular Diagnostics, University of Virginia, Charlottesville, VA, and Editor, *Clinical Chemistry*, Washington, DC
