J. Wesley Todd : Todd's Cardiovascular Review Book: The Complete Invasive Book Set in 5 volumes before purchasing it in order to gauge whether or not it would be worth my time, and all praised Todd's Cardiovascular Review Book: The Complete Invasive Book Set in 5 volumes:

6 of 7 people found the following review helpful. I passed my RCIS exam!By Martie TI used Wes Tod's review books to study for my RCIS exam and passed. I did use alternatives to these review books as well, but mainly, this set of materials really helped. The review books revealed exactly what needed to be studied. There were some areas where the education was a bit shallow, but at the very least, the books pointed me in the right direction. Tod's study materials helped me understand what would be on my test and the things I see in the cath lab on a day to day basis. I used the 3rd edition from 10 years ago actually and made a 790/900pts, in September 2011. I'm writing this review prior receiving this product, but after using an older edition for my studies, I know this will be an exceptional set to have for

references and to keep my cath lab understanding and skills sharp.0 of 0 people found the following review helpful.
VERY NICE BOOKSBy Abid KhanVERY NICE BOOK I WILL SUGGEST TO EVERY ONE WHO IS PREPARING FOR RCIS EXAM.ALL THE BEST FOR YOUR EXAM.0 of 0 people found the following review helpful. Five StarsBy jksGreat deal, fast shipping

This unique study material prepares cardiovascular invasive nurses and technologists for the national invasive cardiovascular registry examinations. It is also an inservice training manual for new cardiac cath lab staff. This set consists of 5 volumes. Volume 1, Invsive Basics. Vol. 2, Diagnostic Techniques. Vol. 3, Hemodynamics. Vol. 4, Interventions. Vol. 5, Practice Exams. Includes the following: 60 chapters with over thousands of Registry type exam questions. Each question has clear answers, explanations and references. Thousands of graphics for visual learners. Based on latest CCI and ASRT exam updates. Detailed inidex and outlines for each of the 60 chapters. Includes practice exams with answers and explanations.

This set of 5 review books will prepare you for the "Registered Cardiovascular Invasive Specialist" (RCIS) and Certified Interventional Technologist (CIT) examinations. The RCIS is the national board exam which may be taken by all cardiac cath lab staff members, RNs, RTs, and CVTs. The CIT is the national board exam for RTs. It may also be used for cardiac employee in-service and continuing education. This set of 5 books prepares readers for the national invasive exams also contains necessary information to prepare for CCI's CV Science exam. Volume #1 in this set contains all this CV Science information. It can also be purchased seperately. In addition, a CD is available from , which presents all this same information. --SICP Book reviewThis is the accepted study guide of choice for the cath lab exam for nurses techs. The format is very readable and the graphics extremely helpful. The real meat comes in the explanations - following each questions where Todd discusses each question - why it is important, tips, WHY the answer is correct and WHY the distracters are wrong. It makes you think. The cost is high, but worth every penny when you consider the scope and size of the books. Together this set is 5 inches thick! If you want to pass the RCIS or CIT exams I highly recommend these books. We also use them to train new cath lab employees. --Cath Lab TechI am currently in my last year of CVT school, studying to be RCIS certified. I could not accomplish my goal without these books. They are very descriptive and test you in a helpful way and also enter new information into each question. The books really tie all aspects of cardiology together. I recommend these books to anyone who is planning to take the RCIS. --Invasive CVT studentAbout the AuthorWes Todd, BS in engineering, RCIS, RCSA. 5 years cath lab experience in Portland hospitals, working with leaders in field. 23 years Spokane Community College faculty and director of CVT Invasive Training Program. Past item writer for RCIS exam. Takes RCIS exam regularly. Ranked highest RCIS score in nation. Now retired, he continues to update and publish CV exam review material.
