Margaret M. Andrews PhD RN CTN-A FAAN, Joyceen S. Boyle RN PhD FAAN CTN : Transcultural Concepts in Nursing Care before purchasing it in order to gage whether or not it would be worth my time, and all praised Transcultural Concepts in Nursing Care:

0 of 0 people found the following review helpful. One StarBy Benjamin K SteinerDon't like, poorly written and concepts are all over the place.0 of 0 people found the following review helpful. The condition of the book was great. I really enjoyed this bookBy Dorotea HaynesReceived this book quick. The condition of the book was great. I really enjoyed this book. It provided good information on various cultures and how nurses can help patients have great experiences and outcomes.0 of 0 people found the following review helpful. Three StarsBy RotezWater damage was in the first chapter.

Transcultural Concepts in Nursing Care helps nursing students transform their thinking so they develop into culturally

competent nurses capable of safe, thoughtful, and ethical care of individuals, families, groups, and communities of diverse backgrounds. *Transcultural Concepts in Nursing Care* takes a life span approach to describe cultural variations in lifestyle, habits, beliefs, and life process; and in doing so, provides a framework that will improve health and nursing care to minority, underrepresented, disenfranchised, and marginalized populations. Rather than just covering specific cultures and expected behaviors/beliefs of that culture, the authors provide students the tools they will need as nurses to effectively perform cultural assessments and incorporate their findings into their interventions. With more culture specific examples in this edition, the text offers the knowledge needed to provide culturally competent and contextually meaningful care for all clients. Fully updated in its seventh edition, this unique resource creates an interdisciplinary knowledge foundation reflecting the cultural changes in the clinical nursing environment.
