Mark A. Popovsky, MD : Transfusion Reactions, 3rd edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Transfusion Reactions, 3rd edition:

A revised reference on noninfectious complications of transfusion is now available for pre-order. The third edition of Transfusion Reactions expands the clinical presentation, differential diagnosis, mechanism, treatment, and prevention sections for each reaction, as applicable. Also included are chapters on hematopoietic progenitor cell infusion and nursing care management. Third edition updates highlight the following: Significant new activity in the areas of

transfusion-related acute lung injury and transfusion-associated circulatory overload. New chapters: Acute pain transfusion reactions (newly recognized). Reactions in the developing world. Expanded chapters from the second edition. (AABB Press, 2007, hard cover, 582 pages, ISBN #978-1-56395-244-9)
