Daniel J. Batsie, Daniel J. Limmer EMT-P, Joseph J. Mistovich : Transition Series: Topics for the Paramedic before purchasing it in order to gauge whether or not it would be worth my time, and all praised Transition Series: Topics for the Paramedic:

0 of 0 people found the following review helpful. disappointed By Kathryn Steen I chose to recert my National Registry by exam and tried to use this book to help prepare. The information presented in this book alternately contradicted itself and contradicted other sources that I attempted to use for clarification. There are review questions at the end of each chapter, but the answers are not provided in the book. You have to access the publisher's website to get the answers. You can only do this by typing some sort of security code into the website. I rented the book, so it was not in the original packaging--hence, no security code and I could not get the answers to the review questions. Multiple phone calls to and to BradyBooks and no one could help. Brady told me that they don't sell/give out the codes separately from the book. What a scam. I miss the days when a book was a self-contained resource and you did not

need web support to use it. 0 of 0 people found the following review helpful. Five Stars By Sean Great text book 0 of 1 people found the following review helpful. Decent book By Ronnie The information in this book seems good but it also seems to be lacking some of the "essential" topics in the NHTSA Transition instructor guidelines. Still yet, I believe I would purchase it again and may purchase some for the EMR, EMT, and Advanced.

Transition Series: Topics for the Paramedic is designed to act as a transition guide between the 1998 U.S. Department of Transportation's Emergency Medical Technician-Paramedic National Standard Curriculum and the 2009 Paramedic National EMS Education Standards. Providing a timely, topical continuing education guide, this book provides both an overview of new information found in the Education Standards and the Paramedic level and provides a source of continuing education for practicing Paramedics.
