Claudia Birkenshaw : UB-92 Handbook for Hospital Billing, With Answers, 2005 Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised UB-92 Handbook for Hospital Billing, With Answers, 2005 Edition:

The first textbook that provides an overview of the health care coding and billing process to help new and experienced billing professionals understand and comply with the UB-92 billing form requirements. The handbook provides a global view of how the billing function works in a hospital environment and instructs readers how to complete coding in Form Locator boxes, how to comprehend the numerous coding choices available, and how they may correctly decipher the options. The book is filled with text boxes that offer clarifications on key points, vignettes that explain how the billing office process works, overviews of basic payment methodologies, and 69 quizzes that can be used for

performance evaluations or class work assignments.
