cannot begin to say how well this book prepared me to carry out sophisticated financial analysis for an \$8 million revenue physician group, but also to refresh my memory of concepts to share with nonfinancial managers. A great text, complements his Intermediate Financial Management textbook perfectly. Also see books by William Cleverly at Ohio State and Ernest Pavlock (wrote the bible on physician group financial management). 1 of 1 people found the following review helpful. Selected by leading medical management education course By A Customer Gapenski's book is the lead resource for the University of Texas "Alliance for Medical Management Education" modules on Health Care Contracting and Accounting and Finance. The book is an excellent resource, and is readable enough to be covered thoroughly and read by the physicians who comprise the student body.
