Marie A Moisio, Elmer W. Moisio : Understanding Laboratory Diagnostic Tests (The Health Information Management Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Understanding Laboratory Diagnostic Tests (The Health Information Management Series):

0 of 0 people found the following review helpful. Required text bookBy CustomerRequired text, but my teacher is very pleased with this text and it seems easy to understand.0 of 0 people found the following review helpful. GREAT! Thanks So much and God blessBy jillie bGREAT! Thanks So much and God bless! 0 of 1 people found the following review helpful. UNDERSTANDING a 'MIS'By Dr. GNot a student but thought when I read the description it WAS what I needed.I needed to UNDERSTAND the blood work that is typically ordered for me annually. I needed to understand WHY it's ordered, WHAT it is for, WHAT are some causes and preventative measures to take to improve the results. in lay terminology. DID NOT need a quiz or short summary as though I knew it all.Format just didn't

provide more than a 'clinical' description. People 'like me' are NOT in the medical field but want to educate themselves so that they LEARN about the tests they get.

Ideal for instruction in nursing, health information, medical assisting, medical transcription or health unit coordinator programs, this text contains numerous end-of-chapter exercises and case studies to challenge the learner. The most commonly ordered tests are covered, complete with an accurate description of the name and type of test, how the test is performed, indications and contraindications for the test, and most importantly the purpose or diagnostic significance of the test. When appropriate, tests are linked to diagnoses or problems. Many lab books on the market are geared solely for the nurse or technician who must perform the test whereas this book is an excellent resource for any allied health professional who needs a basic understanding of commonly ordered laboratory and diagnostic tests.

LABORATORY TESTS: Blood Cell Tests. Blood Chemistry Tests(Part I).Blood Chemistry Tests(Part II).Tests of Coagulation and Hemostasis. Infectious Disease and Immunodiagnostic Blood Tests. Urine and Fecal Studies. Culture and Sensitivity Tests. Amniotic Fluid and Cerebrospinal Fluid Tests. Other Body Fluid Tests. DIAGNOSTIC TESTS: Radiology Studies. Nuclear Medicine Studies. Endoscopy Studies. Ultrasound Procedures. Special Organ Studies. APPENDIX A. APPENDIX B. APPENDIX. GLOSSARY. REFERENCES. INDEX.About the AuthorMarie A. Moisio, M.A., RHIA, has 25 years of experience in health information management. In addition to teaching medical billing, medical coding and health information processing for more than 15 years, she served as director of health information departments in a 400-bed regional medical center and a 450-bed regional psychiatric treatment facility. Her professional experience also includes service as a consultant for several long-term care facilities and physician offices as well as positions in health information management, compliance, coding practices, insurance claim auditing and patient record documentation. Moisio has taught numerous workshops covering legal aspects of health information management and documentation. She is also the author of A GUIDE TO HEALTH INSURANCE BILLING and UNDERSTANDING LABORATORY DIAGNOSTIC TESTS.
