**Paul Offit M.D., Charlotte Moser : Vaccines and Your Child: Separating Fact from Fiction** before purchasing it in order to gage whether or not it would be worth my time, and all praised Vaccines and Your Child: Separating Fact from Fiction:

3 of 4 people found the following review helpful. Five StarsBy Claudine TorfsScientifically proven facts that save babies' lives.22 of 27 people found the following review helpful. For anyone looking for FACTUAL infomation on vaccinesBy Katrina EdmondsThis book is a wonderful resource for parents who want to know more about vaccines and the science supporting them. This book discusses both the risks and benefits of vaccination in a factual manner

and sites the research along with links for further information. There is even a supplementary reading section. I have read several books about vaccines, and this is the best one so far. It addresses common areas of concerns for parents and nothing is sugar coated, it contains factual information and shares a few personal stories as well. Great resource! 12 of 17 people found the following review helpful. Please get this book! By Mrs MW It is a "Just the facts" type of book. Everything is documented. Enough of the vaccine lies! So many parents are told things that are pseudoscience and this addresses it so they can protect their children.

Paul A. Offit and Charlotte A. Moser answer questions about the science and safety of modern vaccines. In straightforward prose, they explain how vaccines work, how they are made, and how they are tested. Most important, they separate the real risks of vaccines from feared but unfounded risks. Offit and Moser address parental fears that children may receive too many vaccines too early, that the HPV vaccine may cause chronic fatigue or other dangerous side effects, that additives and preservatives in vaccines cause autism, and that vaccines might do more harm than good. There couldn't be a better moment or more pressing need for this book, which offers honesty instead of hype in the quest to protect children's health.

The perfect book for parents seeking accurate and detailed vaccine information. (Ari Brown, M.D., pediatrician, author of *Baby 411: Clear Answers and Smart Advice for Your Baby's First Year*) This new book is a valuable resource for all parents concerned about the health of their child. *Vaccines and Your Child* makes it easier than ever for parents to wade through the abundance of information about vaccines, setting the story straight about vaccine safety. (Rosalynn Carter, former First Lady, cofounder of *Every Child By Two*) Paul Offit, M.D., and Charlotte Moser of the Vaccine Education Center come together to provide a great deal of useful information. *Vaccines and Your Child* is a scholarly and much needed read for any concerned parent. (Midwest Book) About the Author Paul A. Offit, M.D., FAAP, is the chief of Infectious Diseases and the director of the Vaccine Education Center at The Children's Hospital of Philadelphia, as well as the Maurice R. Hilleman Professor of Vaccinology and professor of pediatrics at the University of Pennsylvania School of Medicine. He has authored *Autism's False Prophets*; *Vaccinated: One Man's Quest to Defeat the World's Deadliest Diseases*; *The Cutter Incident: How America's First Polio Vaccine Led to the Growing Vaccine Crisis*; and *Deadly Choices: How the Anti-Vaccine Movement Threatens Us All*. Charlotte A. Moser is the assistant director of the Vaccine Education Center at The Children's Hospital of Philadelphia and creator of the center's program for parents, known as Parents PACK. She has developed a variety of educational materials about vaccines, oversees the center's Web content and contact center, and writes the monthly e-mail newsletter for Parents PACK, which has several thousand subscribers.
