Claudia Rumwell, Michalene McPharlin : Vascular Technology: An Illustrated Review, Fourth Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Vascular Technology: An Illustrated Review, Fourth Edition:

16 of 16 people found the following review helpful. Passed on my first try with using JUST this book :) :)By DI HIGHLY recommend this book if you are studying for the RVT registry. If you know it, you will pass!!!5 of 5 people found the following review helpful. The best foundation book on Vascular Ultrasound.By Pixie PoetThe best foundation book on Vascular Ultrasound. I own the old version which I thought was great. This one has more color pictures and made a great book even greater, which I didn't think was possible. Very well organized and clearly explained. Index was very helpful. It comes with a test you can take in the back which gives you 15 CMEs, which is why I purchased it in the first place.0 of 0 people found the following review helpful. Very nice layout and picturesBy CustomerI really like this book I think the pictures are great I love the way the information is laid out. I got this to

study for my vascular boards which I have not taken yet so I don't know if it is a good study till but I am learning a lot from it.

The standard has been raised. Completely revised and updated, significantly expanded, and better than ever, the new edition of this popular book explains and illustrates what you need to know to pass the Vascular Technology exam topic by topic, in one volume, by leading technologists who themselves have taken, passed, and helped others prepare for and pass their RVT exams. Based on the registry's exam outline, it includes new illustrations, duplex and color flow images, Doppler waveforms, photo-documented physiologic exam techniques, angiograms, new self-assessment exercises, glossaries, and integral CME application. Particularly useful in combination with Vascular Technology Review, Vascular Physics Review, and ScoreCards for Vascular Technology.

About the Author Claudia Rumwell, RN, RVT, FSVU is editor of the Vascular Laboratory Operations Manual and the Vascular Policies Procedures Manual on LabDisk, recipient of the SVU's distinguished service award, and a Fellow of the Society for Vascular Ultrasound. She has served as Technical/QA Director for the Oregon Health Sciences University Hospital/Providence Health Systems Vascular Laboratory and lectures on registry preparation, provides consulting services, and continues to write in her spare time. Michalene McPharlin, RN, RVT, FSVU has managed the vascular surgery clinic and vascular laboratory at Henry Ford Hospital/Henry Ford Health Systems in Detroit. She lectures widely on registry preparation and vascular topics, has chaired the SVU legislative watch subcommittee, serves on the editorial board of The Journal for Vascular Ultrasound, and has been a member of the SVU board of directors. Like Claudia, Micky is a Fellow of the Society for Vascular Ultrasound, the recipient of its distinguished service award, and editor of the Vascular Laboratory Policies Procedures Manual.
