The objective of Vital Signs for Medical Assistants is to provide the student with a simulation that evokes the true experience of performing procedures they will face on the job. The program enables users to focus on 15 vital signs and measurements, including respirations, blood pressure, apical pulse, height and weight measurements for both

adults and infants, and more. Vital Signs for Medical Assistants gives medical assisting students and professionals the opportunity to practice their skills with Macromedia Flash animations, audio, and text.
