Robert Thayer Sataloff : Voice Science before purchasing it in order to gage whether or not it would be worth my time, and all praised Voice Science:

0 of 0 people found the following review helpful. Good foundational resource for speech-language pathology students By Ken Anderson While Dr. Sataloff is a major contributor to this book, he should probably be considered editor in chief, since many chapters are a collaboration with other experts or written entirely by his colleagues. Voice Science is one of three student editions prepared for speech-language pathology students (medical students) and clinicians who are new to the field of voice care from selected chapters of the third edition of Professional Voice: The Science and Art of Clinical Care to provide relevant information in an affordable format. [inside flap] In the preface Sataloff indicates that Voice Science is part of a 5-book student edition of selected chapters from the third edition of Professional Voice: The Science and Art of Clinical Care. Content is medical and highly scientific. Note the intended audience in the previous bullet point. A helpful glossary follows the content body. 2 of 3 people found the following

review helpful. Nothing but leaching off others...By Lonnie[from the description above] "by Robert Thayer Sataloff (Author) 'Fortunately, one need not be a physicist in order to function well in professions involved with hearing, sound, and music...'"Sataloff is a gifted physician but has leached off many other people and created an entire line of these books. Notice that he is the "Author" but always has many others do the writing. There are many better books on the subject.

This volume is designed to provide speech-language pathologists and other members of the voice team with a thorough grounding in the anatomical, physiological and mechanical aspects of voice production, as well as an introduction to cutting-edge research in voice science.

About the Author Robert Thayer Sataloff, MD, DMA, FACS, Professor, Department of Otolaryngology - Head and Neck Surgery Jefferson Medical College, Thomas Jefferson University, Adjunct Professor of Otolaryngology, University of Pennsylvania, Chairman, Department of Otolaryngology - Head and Neck Surgery, The Graduate Hospital, Chairman, Board of Directors, The Voice Foundation, Faculty, Academy of Vocal Arts, Faculty, The Curtis Institute of Music, Chairman, American Institute for Voice and Ear Research, Philadelphia, Pennsylvania
